

To the hiring manager,

Hi! I'm Gabriel Mutai and I'm writing this letter to express my interest in the Business Development intern role at Yogger. As a soon to be graduate majoring in Computational Neuroscience and a minor in Entrepreneurship and Innovation, I am confident in my ability to contribute effectively to your team and project.

My background is diverse and spans within areas of my ever growing interests within life. I chose to study Neuroscience as I had always been fascinated with the complexities of the human brain and behavior. I was able to fortunately discover my strong interest in entrepreneurship as it stems from my commitment to self-development and always finding ways to be resilient when faced with challenges. Finding ways to intertwine both has led me to search for opportunities with a strong sense of purpose.

This semester, I've had the opportunity and privilege to work as an intern at the Conquer Accelerator under the Michigan State University Research Foundation. This experience led me to solidify a working understanding of the business processes within a startup and has led me to value career opportunities in positions that encourage and welcome the ability to wear multiple hats within a role.

My coursework has prepared me to harness an array of technical skills. My proficiency spans from being able to code in Python to utilizing both Microsoft365 and Adobe creative suite to its fullest capabilities. In addition to my technical skills, I am an adaptable learner who thrives in project-based environments. I am eager to expand my knowledge and skills and contribute to innovative projects.

I stumbled upon the job listing on Handshake as I'm actively looking for opportunities for the summer as I transition into the career field. Having an entrepreneurial mindset, I found the idea to be fascinating and would love to learn more about Yogger. Also, as a fairly active individual, I am always wanting to learn more about ways to improve my form within resistance training, stretching, or playing the sports I enjoy. I am curious about what led to the founding of the company, what problems it aims to solve, and how it aims to position itself as an innovator within the sports technology industry.

Thank you for considering my application! I am excited about the possibility of contributing to Yogger and would welcome the opportunity to discuss how my background, skills, and aspirations align with your needs. Please find my resume attached for your review.

Sincerely,

Gabriel Mutai
